

Pharmacy Technician

Start a career that helps people and brings you the respect and income you deserve

Pharmacy technicians help licensed pharmacists provide medication and other healthcare products to patients. New Horizons offers the Pharmacy Technician Program to train you in medication order processing, inventories, compounding, packaging, use of a prescription balance, HIPAA privacy act and computers.

Why Consider a Career as a Pharmacy Technician?

- 21-35% growth with projected needs for employees at 107,000 through 2014
(Source - careervoyages.com)
- Michigan labor statistics indicate an employment increase of 1,740 and annual job openings of between 174-280
- The *Bureau of Labor Statistics* expects an increase of available positions of 18 to 26 percent

Employment of pharmacy technicians is expected to grow faster than the average for all occupations through 2012 due to the increased pharmaceutical needs of a larger and older population, and to the greater use of medication. The increased number of middle-aged and elderly people—who (on average) use more prescription drugs than do younger people—will spur demand for technicians in all practice settings. With advances in science, more medications are becoming available to treat more conditions.

eLearning

Online ANYTIME and EVOLVE consist of web-based self-paced training that works in conjunction with the classroom instruction. Online ANYTIME is available for the Microsoft Office classes and allows you to learn step-by-step with multimedia, completely interactive courses right on your desktop that are available 24 hours a day, 7 days a week. EVOLVE compliments the Medical Office Procedures and Administration and Anatomy, Physiology and Medical Terminology courses. It contains exercises, questions and activities with immediate feedback.

Learning Lab

Students can enjoy the benefit of the New Horizons Learning Lab for self study.

Certification Preparation Tools

Students will receive MeasureUp practice exams for the Microsoft Office Specialist exams. These tools allow students to focus on their weak areas and minimize the time it takes to learn the material in preparation for taking certification exams.

Certification Exams

Candidates completing the program will prove their skills and knowledge by taking certification exams authored by National Healthcareer Association and Microsoft. Exam costs are included in the program.

Internship

The one month optional internship program integrates your academic and career interests with "hands-on" work experience.

Placement Services

Placement assistance is available for those participants who have completed the Pharmacy Technician Program.
